Objective

Fourth-year Computer Science student and Frontend Developer with hands-on experience building and deploying full applications using React, Next.js, TypeScript, and JavaScript. Experienced in turning designs into responsive, user-focused interfaces through reusable components, clean state management, and real API integration. Built and deployed multiple applications independently, including a movie-discovery platform with live API integration and persistent state. Currently developing data engineering fundamentals through DEPI to gain a broader understanding of modern software systems. Seeking a Junior Front-End Developer role where I can contribute to real products, apply my practical development skills, and continue growing within a professional team.

Education

October 6 University — Giza, Egypt 09/2023 – 06/2027 (*Expected*)

Bachelor of Computer Science | Major: Computer Science | CGPA: Very Good

Professional Experience

Data Engineer Trainee — Digital Egypt Pioneers Initiative (DEPI), Egypt 07/2026 – *Present*

- Built data models in Python and SQL that support 50+ performance reports, used daily by the marketing department to track campaign performance.
- Wrote Python scripts for data cleaning and transformation, and built SQL queries to move raw data through ETL pipeline steps.
- Worked hands-on with data pipelines on Microsoft Azure, and explored applications of AI in data engineering workflows as part of the training curriculum.

Web Design Trainee — National Telecommunication Institute (NTI), Egypt 08/2026 – 09/2026

- Designed web pages using HTML, CSS, and JavaScript.
- Applied responsive web design principles to deliver clean and user-friendly interfaces.
- Practiced modern web development techniques and UI implementation.

React Front-End Trainee — Information Technology Institute (ITI), Egypt 07/2026 – 08/2026

- Engineered responsive web interfaces using HTML, CSS, JavaScript, React.js, and Tailwind CSS.
- Built and maintained a library of 20+ reusable React components, cutting duplicate code across training projects.
- Worked with API responses and JSON data to populate dynamic web interfaces, handling loading and error states for a smoother user experience.
- Implemented unit testing using Jest to catch regressions and keep components reliable as the codebase grew.
- Optimized layouts across mobile, tablet, and desktop breakpoints for consistent usability.

Projects

Studio Ghibli Web App 2026

React.js • Vite • Tailwind CSS • REST API • LocalStorage • Axios • HeroUI • GSAP

- Built an interactive movie discovery platform with search and watchlist functionality using React.js and Tailwind CSS.
- Connected the app to a REST API to fetch and display movie information.
- Managed watchlist state with React state management and LocalStorage, so saved movies persist across sessions.
- Structured reusable components and responsive layouts for a consistent experience across devices.

TechMart E-Commerce Web App 2025

Next.js • React • Tailwind CSS • REST APIs • Radix

- Built a 5-category storefront (Electronics, Fashion, Home & Garden, Sports, Deals) with product listings, cart, and wishlist functionality.
- Implemented user authentication and account flows, giving each shopper a private account, order history, and saved wishlist.
- Handled checkout data with attention to client privacy, keeping sensitive customer information scoped away from public-facing views.
- Styled fully responsive interfaces with Tailwind CSS, keeping the experience consistent from mobile to desktop.

Skills

Technical Skills: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs, Axios, Jest, Git, GitHub, Responsive Web Design, JSON, Python, C++, Java, Object-Oriented Programming

Languages: Arabic (Native), English (Very Good), German (A1)

Courses & Certifications

- Generative AI — International Business Machines Corporation (IBM SkillsBuild) | 2026
- Generative AI — Amazon Web Services (AWS) | 2026
- McKinsey.org Forward Program — McKinsey & Company | 2026
- Front-End Diploma — Route IT Training Center | 2025

Leadership & Achievements

- Face Recognition Project: Led a 5-person team in developing a Python-based face recognition project, coordinating tasks and supporting project development.
- Cinema Management System: Prepared software documentation for a university Cinema Management System, contributing to the analysis and documentation of system requirements.
- AI Maze Game: Contributed to an AI-based maze game as part of a university project, supporting development and implementation.
- Academic Achievement: Received full marks for 3 university software projects.

Activities

- Head of Operations — University Entrepreneurship Club: Led and coordinated operational activities, organized events and initiatives, and worked with team members to support the club's entrepreneurship activities.
